Subject: Water and sewage

Katie - could you please send me any info on the southern node plan that is up to date and honest! Another words what plans have been done to date. Secondly could you send me the amount of money the county and PSA have spent on this endeavor. (county money or grants) Thirdly, we have been given a verbal estimate on what it would take to put sewage at the Webster site, as well as servicing the small surrounding area. We will get a hard estimate in the mail. Needless to say, the million dollar estimate that was made public by the PSA is not only a slap in the face to tax payers and supervisors, it turns out it was self serving to the town, and is causing quite a stir.

We will be sharing our estimates with the state over the next week so we can one more time try and attract an Ag company looking for value added ability in this market.

At your earliest convenience please send the info.

Thanks Eyre Baldwin
