

The Eastern Shore of Virginia 9-1-1 Communications Center is proud to announce that we are now utilizing a potential life-saving application called Smart911.

This application provides 9-1-1 dispatchers with information that you supply in your **FREE** Smart911 online profile such as your home address, medical information, emergency contacts, and other important information that could assist you in an emergency.

We encourage all citizens, especially the elderly and disabled, to create a Smart911 profile and provide as much information as possible.

To create a profile, visit [www.smart911.com](http://www.smart911.com)

For further information, or assistance with creating a Smart911 profile, please contact the ESVA 9-1-1 Center at (757) 787-0911 and ask for SCO Hodgson.

A free service – Provided by your community

Private and secure – You control your information

Saves time in an emergency – When seconds count
